803 dualpower

Ideal for use in closed spaces or in urban areas, the Wacker Neuson 803 Dual Power has the versatility to run on diesel fuel or electricity. Featuring a dual power option, the machine connects to an emission-free auxiliary electro-hydraulic power unit in a few easy steps. This expands application and location opportunities.

	HPU8
Operating Weight*	**423 lbs**
Engine output	**12.1 hp / 9.0 kW**
Requirement	**480 V**

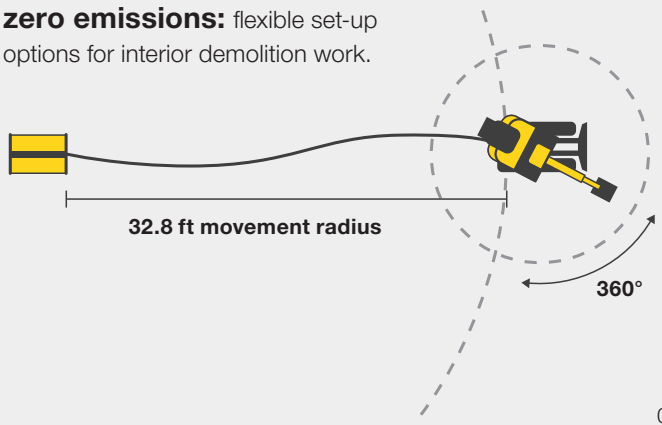
* Includes hydraulic oil

- No performance loss due to electric operation
- Simple plug and play connection of the power unit to the excavator undercarriage and an available electric power source, such as a generator
- 33-foot (10 m) long hydraulic hose allows freedom of movement away from the power unit when in electric mode
- Telescopic undercarriage reduces track width from 33.9 inches to 27.6 inches
- No need to forklift the machine from transport vehicle to the work area – simply drive the excavator right on site

The 803 Dual Power allows you the option to rent the machine alone as a diesel excavator or as an emission-free machine with the power unit, depending on customer request.

dualpower

The electro-hydraulic power unit (HPU8) is the bridge between the excavator and an electric power source.

Quick relocation on site: simply hook up the power unit to the dozer blade.


Full freedom of movement, zero emissions: flexible set-up options for interior demolition work.
