Built Around You

B Series Loader Backhoes continue the New Holland tradition of superior power, performance, and serviceability and now offer even more features and options to suit your needs. A choice of six distinct models means you are sure to find the ideal match for your requirements. Whether you are digging, loading, trenching or pushing – you can count on New Holland Loader Backhoes to deliver time-saving performance.

- B Series loaders provide superior dump reach for easy center filling of trucks.
- B Series backhoes out-lift other machines throughout the range of the digging cycle and offer improved bucket and dipper breakout forces.
- The curved-boom backhoe design gives B Series machines a lower transport height, while maintaining the narrow boom design for excellent visibility into the work area.
- Two transmission options – a Powershuttle or Powershift—are available for most B Series models to match your operating needs.
- Outboard maintenance-free service brakes and separate SAHR park brakes provide enhanced performance and control.
- Easy-open flip-up hood allows a wide access with low effort for daily maintenance needs.
