

EZ53

With a powerful engine and compact footprint, the Wacker Neuson EZ53 provides excellent excavation performance in a range of applications. Even in hard-to-access locations in urban areas or confined job sites, zero tail excavators are up to the challenge.

- Sophisticated technology delivers significantly higher engine and hydraulic performance and reduced fuel consumption
- High performance turbo diesel engine increases material handling capabilities, resulting in improved excavation
- Optional Vertical Digging System (VDS) achieves up to 25% of time and material
- Spacious and comfortable cab design
- Tilting cab, large, side-mounted engine hood and large removable chassis covers on the inside and out offer exceptional service access
- Up to five auxiliary control circuits with their own pressure-less return pipe for complex attachments
- Optional additional rear weight for increased stability
- Options include hydraulic quick coupler and steel tracks

EZ53

Operating weight	11,539 lbs
Digging depth (Standard dipper stick)	137.8 in
Engine output	58.9 hp / 43.9 kW

Most powerful excavator in its class.

Cab can be tilted to the side in a few easy steps for maintenance.

Higher digging forces mean greater productivity.
