

EZ38

The highly compact and versatile EZ38 excavator combines the performance of a conventional track excavator with the excellent maneuverability of a zero tail swing machine. Available in a canopy or full cab version, you also have the option of a standard or long dipperstick.

- Standard equipment includes rubber tracks, dozer blade, boom mounted working light and a control pattern change system
- Roomy cab offers easy access, operator comfort and functionality, featuring adjustable armrests and seat, as well as intuitive controls
- Optional Vertical Digging System (VDS) enables progressive tilting of the superstructure by to 15° to compensate for slopes up to 27%
- Unit equipped with pattern control selector valve for versatility and ease of use
- Tilttable cabin for easy accessibility to all maintenance components

EZ38

Operating weight	8,274 lbs
