

ET20

Designed for big performance in a small package, the Wacker Neuson ET20 features exceptional digging depth and greater power. An intelligent cooling system enables the machine to work under full load at high ambient temperatures, while the roomy cab offers comfort and sophisticated control features. Both the cab and canopy can be removed, if needed, without impairing machine functionality.

- Telescopic undercarriage reduces track width from 51 inches to 39 inches
- Folding dozer blade extension accommodates narrow areas
- Maneuver through low clearance heights with the cab or canopy removed
- Can be easily transported with a small trailer
- Ideal access for service, with a large engine hood and removable covers

ET20

Operating weight	4,420 lbs
Digging depth (Standard dipper stick)	97.8 in
Engine output	17.2 hp / 12.8 kW

Most powerful total performance in its class with up to 30% higher performance than comparable machines.

Standard axillary control circuit for connecting attachments.
