

ZD160-3

The WD10G175E15 diesel engine is powerful, efficient, energy-saving and environmentally-friendly.

The planetary-gear hydraulic-power shift transmission has a sensible and compact structure, allowing more flexible and convenient manipulation.

The transfer case, transmission and hydraulic pump are sensibly configured, which significantly improves the compactness of structure, allowing easier maintenance.

It is equipped with a special micro-drive pedal to achieve short term parking and slow moving.

Track Roller

The track roller employs the advanced heat treatment process for overall stream hardening to improve the thickness of wear-resistant layers with superior resistance, resulting in a significant extension in service life.

No.	Item	Parameter	
Engine	Model	WD10G175E15	
	Rated power	120kW	
Track	Width	510mm	
	Height	65mm	
	Ground contact length	2430mm	
Operating weight	Operating weight	16402kg	
Working pressure	Rated pressure	14MPa	
Working equipment	Dozer blade	Width	3416mm
		Height	1150mm
		Maximum lifting height	1095mm
		Blade capacity	4.5m ³
Dimension	Overall dimensions	5025mm×3416mm×2783mm(To top of exhaust stack)
