

ZD220-3

The NT855-C280 Cummins engine (third generation) is powerful, efficient and saves energy.

Based on over 40 years of professional manufacturing experience, it has a more reliable quality and more stable performance.

It employs international advanced technology and design concepts, making the overall configuration more economical and comfortable.

Toggle control

It employs toggle control in accordance with global trends, making the overall layout more ergonomic. It has convenient, flexible and comfortable manipulation, all of which indicate the thoughtful arrangement of the technology.

No.	Item	Parameter	
Engine	Model	NT855-C280 Cummins (third generation)	
	Rated power	162kW	
Track	Width	560mm	
	Grouser height	72mm	
	Ground contact length	2730mm	
Operating weight	Operating weight	24300kg	
Working pressure	Rated pressure	14MPa	
Working equipment	Dozer blade	Type	Angle blade/Straight tilting blade
		Width	4365/3725mm
		Height	1055/1315mm
		Maximum lifting height	1292/1210mm
		Blade capacity	4.8/6.4m ³
Dimension	Overall dimensions	6060mmx4365mmx3395mm (To top of exhaust stack)
